

World's First Play to Earn Cricket Game NFTs launches on GuardianLink - A Zero Gas Fee Layer 2 for NFTs

- *Meta Cricket League (MCL) becomes the first NFT collection to drop on
GuardianLink's Zero Gas Fee Layer 2*
- *NFTs minted on Jump.trade will be interoperable with all major blockchains*

India, April 2022: [GuardianLink](#) the NFT ecosystem company has launched a Zero Gas Fee Layer 2 for NFTs using ZK Rollup in partnership with StarkWare to onboard its entire community of NFT Holders, brands, artists, and games. Jump.trade, the international gaming NFT marketplace introduced by GuardianLink, will debut its exclusive cricket NFTs and digital cricket collectibles, as a part of its Meta Cricket League (MCL) with Zero Gas Fees.

The technology would be a first for the Asian market and will revolutionise NFT minting. While the NFTs are minted on this blockchain protocol with high throughput and zero gas fees, it is still secured by Ethereum as Layer 1.

GuardianLink leveraged StarkWare's cost-efficient, fast and reliable technology as the underlying base to build and innovate on for launching its Layer 2 protocol. This enables interoperable blockchain protocol with all major networks including Ripple, Solana, Polygon and Avalanche, among others. Apart from that, the Layer 2 also enhances transaction speed and enables effective scaling up High Frequency Trading and NFT Gaming.

Arjun Reddy, Co-Founder & CTO of GuardianLink said, *"Our R&D team has been diligently working on providing technological supremacy for our NFT community, as well Zero Gas Fees Layer 2 and interoperability with top blockchains. This Military Grade Secure product will empower the users to mint on Jump.trade with Zero Gas Fees and support any number of trades throughout its lifetime, thereby encouraging greater participation for markets like India."*

The most technologically advanced NFT collection, MCL NFT, drop will be live on 22nd April, 2022, and the starting point of the drop will be a blind purchase called Super Loot. Every Super Loot will have assured NFTs. The NFTs could either be a set of metaverse cricket players or a combination of metaverse players and authenticated digital bats signed by some of the biggest legends of the game.

By introducing MCL, [Jump.trade](#) becomes the first international gaming marketplace to introduce the world's first-ever cricket NFT game. The cricket game, with its NFTs, brings in P2E opportunities. This would mean that people can monetize their time and effort spent on this game. By playing MCL, players can earn cash prizes and other crypto rewards by challenging other players.

StarkWare is the creator of ZK-STARKs, a private zero-knowledge proof system. The provider of the most validated blockchain solution has already minted more than 50 Million NFTs and processed 150 Million transactions, with half a Trillion dollars in cumulative trading value.
