

## **Kalpana Chawla NFT collection - Never seen before digital assets**

Kalpana Chawla, a name that holds relevance for every aspirant who wants to create a history, and not just that but marking their identity on the global map. The vision behind GuardianLink's drop launches aren't very different too. Aiming at making NFT accessible to every common person, launching Kalpana Chawla NFT collection helped in widening wings for the same.

*Kalpana Chawla has created a legacy unlike any other Indian. She, to this day, serves as an inspiration for a lot of youngsters who aspire to conquer the gravity of their confinement, launch themselves into a stellar career, and make a distinct space for themselves in whatever they want to achieve!*

*While her life might have been short, her achievements nonetheless, touched the skies both literally and figuratively! Although her stint as an astronaut has been highly publicised and celebrated and her legacy has been permanently ingrained in a series of awards, craters, satellite missions, streets spread across the world, and even mountains on the Mars, very little has been known about her personal life and very little has been made available on the public domain.*

***What if there was a chance for you to get a glimpse of her life through some of the most rare and never-before-seen photographs of Kalpana Chawla accompanied by a quote for which her own life stood as a stunning example?***

This is precisely what we brought to the world of digital collectibles when we dropped the Kalpana Chawla NFTs on BeyondLife.club.

These NFTs were launched directly on the BeyondLife.club marketplace. In an endeavour to make the NFTs more accessible while still preserving the rarity and the prized nature of the NFTs, multiple copies were generated and they were made available for the public on (insert a launch date).

The NFTs ranged from unseen photos of Kalpana Chawla taken during her first encounters with flying on propeller aircraft, clicks from her timers in the aerospace domain, her commitment to her hobbies of mountaineering and hiking, and even photos of her work desk. They were made available by Kalpana Chawla's husband (insert husband's name). The creative team at GuardianLink made it into a stunning animation, rendering it to be more appealing and more collectible!

Pricing from 25\$ each, 1125 NFTs were sold. All the NFTs were met with an overwhelming response, especially from NFT collectors who were enthusiastic about getting their hands on a glimpse of the stellar astronaut Kalpana Chawla's photographs that were never seen before! It was so stunning to see the love and regard that people have for this amazing astronaut in the way the NFTs were sold so fast. And even resold a couple of times in such a short stretch!

***The Kalpana Chawla NFT collection, with no doubt has got a supreme opportunity to every aspirant to own a piece of her legacy. But, what's more that added to the legacy***

***of her NFT collection was, giving the entire revenue outcome to charity that empowers India's children to get educated and become global achievers.***

*This emotion around Kalpana Chawla who stands to be a stunning example for many people to live by and to achieve what they wanted was the biggest driving force behind the stunning NFT sale. At GuardianLink, we aspire to launch more and more NFTs that are bound to not only attract collectors but also inspire common people.*
